

## **Biodiesel Residue**

### **Product Stewardship Summary**

#### Chemical Identification

- Chemical Abstract Service (CAS) Number: 68604-40-0
- Product Name: Biodiesel residue

#### Description of Biodiesel Residue:

Biodiesel Residue is brown liquid. Biodiesel residue is used as a fuel. It is packaged by FutureFuel Chemical Company in bulk quantities.

#### Properties of Biodiesel residue:

- brown liquid
- odorless

#### Safety & Health Information of Biodiesel Residue

Normal safe handling procedures should be used in the workplace. Workers should follow recommendations of Safety Data Sheets (SDS). Consumers are at little risk of being exposed to Biodiesel Residue under normal conditions of use. The following describes health effects from exposure to Biodiesel Residue.

- Skin Contact: Contact with hot material may cause thermal burns
- Eye Contact: Direct contact may cause temporary irritation
- Inhalation: Prolonged inhalation may be harmful
- Ingestion: Expected to be a low ingestion hazard

Biodiesel Residue is not classified as environmentally hazardous.
